Key findings

1. Late deliveries wreck reviews. 62.5% of late orders get 1-2 stars vs 9.2% of on-time orders, a 6.8× risk (T1, $p < 0.0001$; results/stats/stats_summary.md).

2. The promise breaks on long lanes. Northeast-bound parcels from Southeast, South and Center-West sellers are late 12.2-13.0% of the time vs 6.4% inside the Southeast. Median delivery is 20 days in the North vs 9 in the Southeast (a04, T6).

3. Growth is acquisition-only. Just 1.99% of customers re-order within 180 days, and 18.4% of sellers make 80% of GMV (a01, a17). Late first orders repeat less (1.58% vs 2.02%) but the gap is not significant ($p = 0.057$, T3).
